By Philippe Bauduin, Michael Greenhalgh

OREP. Paperback. Book Condition: new. BRAND NEW, Wars and Discoveries, Philippe Bauduin, Michael Greenhalgh, So it was in the Thirties that numerous commodities, appliances and devices taken for granted today were discovered : antibiotics, sulphonamides, radar, turbo-jets, synthetic rubber, mineral oils, radiotelephony, and artificial intelligence. but only the outbreak of the Second World War could give rise to their development and industrial use. In the pages of this book, there is an account of 50 discoveries chosen at will from many others, that, in giving the reader a wider understanding of technological advance, sheds new light too, on the scale of Operation Overlord. Visitors to the Landing Beaches may thus appreciate how humanity as a whole has profited from all the inventions collated in the Battle of Normandy.

Reviews

This ebook is worth purchasing. It is written in straightforward words and not hard to understand. You will not feel monotony at any time of your respective time (that's what catalogs are for about in the event you ask me).

This book will never be straightforward to start on looking at but extremely exciting to read. I actually have read through and that I am sure that I am going to go through once more again in the future. I am happy to explain how this is the very best book I have read through in my individual lifestyle and may be the best publication for at any time.
