## ***Reviews***

*This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Excerpt: .correct shapes as given in plate I, should be carefully noted. P is similar to the corresponding portion of B, with the exception that stroke 3 in P is a trifle below the middle. Stroke 5 is first made vertical and straight and then rounded at each end into 4. B. The lower lobe is about i unit wider than the upper. Strokes and 7 are made straight verticals at first and then rounded into 4 and 5; but these two stems must be joined by hairlines. This remark applies also to the R following. The effect of running the two curved stems together is shown in the first B, and is a mistake commonly made. D. Its width is determined as in all the previous letters, by first drawing a square and reducing this by the correct amount. Make stroke 4 a vertical straight line first and then round its extremities into stroke 3. Guard against running the curved stem around upon the guide lines; as shown in plate I a small portion of hairline should intervene between the curved stem and the guide lines at either extremity. U. The method of construction is sufficiently indicated in the cut. J. The left-hand portion extends up two units or more from the lower guide. Finish the lobe as a complete circle before filling in the angle between strokes 2 and 5 as shown in plate I. This angle, in small letters, needs little or...
