Not illustrated. 1917 Excerpt: .this structure is liable, and always preceded by hyperemia. Sympptomatology.--It may arise as a symptomatic affection in the course of syphilis, gout, rheumatism, diabetes, tuberculosis, gonorrhea, etc., or it may occur as the results of an extension of inflammation from adjacent ocular structures. It is also due to traumatism, exposure to cold and, wet, febrile diseases, new growths, etc. Dental caries has also been recorded as a causal factor. The disease is sometimes encountered as an idiopathic affection. The symptoms and signs of various forms of iritis vary more or less according to the character and intensity of the inflammation, but on the whole are rather constant. Ciliary injection present in disease of the iris, ciliary body, and cornea, derived from the anterior ciliary vessels, from perforating episcleral branches, most marked immediately around the cornea, fading as the cornea is approached. Color of injection is pink,...
